

Commodity Shock & Inflation

Real public data - the 2022 energy/food price shock and inflation.

2022 INFLATION (5-ECONOMY AVG)	EURO NATURAL GAS PEAK	BRENT CRUDE PEAK	INVASION DATE
6.1%	+151%	+38%	24 Feb 2022
Up from low single digits pre-2021 (US 8.0%, UK 7.9%, JP 2.5%).	Aug 2022 vs Jan 2022 - the sharpest move of the three commodities.	Jun 2022 vs Jan 2022; wheat peaked +36% in May 2022.	Reference event for the timeline; not asserted as sole cause.

Energy and food commodity prices and consumer inflation both surged in 2022, coinciding with the 24 Feb 2022 invasion of Ukraine - a region central to global energy and grain exports.

Caveat: this is a timeline and co-movement, not a sole-cause claim. Post-pandemic demand, supply chains, and monetary policy also drove inflation; Japan's muted 2.5% shows the shock was broad but uneven.

Commodity Shock

Brent crude, wheat, and European natural gas, indexed to Jan 2022 = 100.

Commodity	Jan 2022	Peak	Peak month	Peak vs Jan 2022	Latest (Dec 2023)
Brent crude (USD/bbl)	\$85.62	\$117.69	2022-06	+38%	\$77.54
Wheat (USD/mt)	\$326	\$444	2022-05	+36%	\$230
Natural gas, Europe (USD/MMBtu)	\$27.89	\$69.98	2022-08	+151%	\$11.30

Inflation by Economy

Economy	2019	2020	2021	2022	2023
France	1.1%	0.5%	1.6%	5.2%	4.9%
Germany	1.5%	0.1%	3.1%	6.9%	6.0%
Japan	0.5%	0.0%	-0.2%	2.5%	3.3%
United Kingdom	1.7%	1.0%	2.5%	7.9%	6.8%
United States	1.8%	1.2%	4.7%	8.0%	4.1%
